LOTUS VISION

REJUVENATE WITH INMODE MORPHEUS8

A NON-SURGICAL EYE AREA AND FACE REJUVENATION

Your eyes and face are often the first feature people notice about you—and the first to show signs of aging or discomfort. Whether you're dealing with:

- Fine lines/wrinkles
- Under-eye bags
- Dark circle under eyes
- Drooping eyelids
- Acne scarring
- Loose neck skin/adipose deposits
- Sagging jowls

Morpheus8 offers a groundbreaking solution that addresses both beauty and comfort.

CLINICAL AND AESTHETIC BENEFITS FOR THE EYE AREA, FACE & NECK

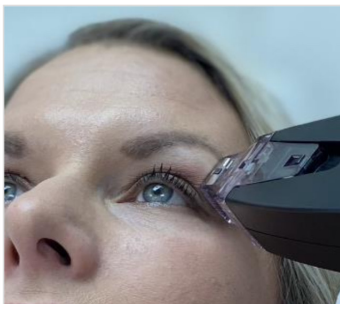

TREATMENT AND METHOD OVERVIEW

Morpheus8 by InMode is a non-invasive treatment that uses **fractionated radiofrequency (RF) energy combined with microneedling** to target the deeper layers of the skin and subdermal tissue and stimulates collagen production. By targeting the deeper layers of the skin, the building blocks will reorganize themselves in a natural anti-aging process. There is little to no damage to the dermis and this procedure provides an extremely uniform effect.

Aesthetic outcomes may include:

- Tighter, firmer eyelid skin
- Smoother fine lines and wrinkles (e.g., crow's feet)
- Improved skin texture and tone
- Reduced under-eye puffiness and discoloration

Rejuvenated and more alert appearance Typically **four treatments** are required to achieve optimal results, generally **one treatment per month**. An individualized treatment plan will be created expressly for you.

On the day of your treatment your treatment area will be numbed with topical cream for 30-40 minutes. This will then be removed and the treatment started. Your skin may feel like it is sunburnt afterwards. We ask you not to use any make up for 48 hours.

It is perfectly normal to have some fine crusting at the microneedling sites, which resolves quickly. Swelling and warmth are expected for the first few hours post procedure.

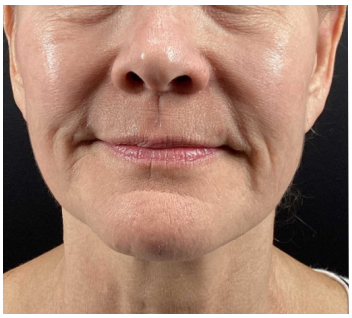

Sun protection from all UV exposure is critical—please remember to wear your sunscreen if out and about both pre- and post-treatment.

You will receive exact instructions for pre-care; day-of-treatment care; and post-care from Dr. Nemi's practice.

Following these instructions without fail assures that the best results are achieved.

WHY MORPHEUS8 IN OPHTHALMOLOGY?

- Safe and FDA-cleared for use in delicate periocular skin
- Non-surgical with minimal recovery time
- Can be performed in-office
- Well tolerated with topical anesthesia
- Complements existing dry eye treatments
- Addresses both medical and cosmetic concerns simultaneously

PATIENT SELECTION AND CONSULTATION

Morpheus8 is appropriate for:

- Patients with **age-related periorbital skin changes**
- Those seeking **non-surgical eyelid/face and neck rejuvenation**

A clinical evaluation is required to assess health and determine if Morpheus8 is suitable as part of a treatment regimen or cosmetic plan.
